# SMART CLEAN

Easy clean upholstery fabrics are specifically designed textiles that offer enhanced stain resistance and ease of cleaning. These fabrics are engineered to prevent stains from setting, making them ideal for upholstery applications in both residential and commercial settings. Here are the key advantages of easy clean upholstery fabrics:

## 1. STAIN RESISTANCE:

The fabric is treated with a protective finish that repels liquids, preventing them from penetrating into the fibers. This makes it easier to clean up spills and prevents permanent staining, even from substances such as coffee, wine, or food.

## 2. EASY MAINTENANCE:

Easy clean upholstery fabrics require minimal maintenance. The repellent finish makes it easier to clean up spills and stains, as they can be quickly wiped away with a cloth or mild detergent. The fabric is less prone to trapping dirt or grime, reducing the need for frequent deep cleaning or professional services.

## 3. Durability:

The stain-resistant treatment not only protects against stains but also helps to prevent the fabric from becoming soiled or discoloured over time. The added durability allows the upholstery to withstand regular use and maintain its appearance for an extended period.

## 4. Pet-Friendly:

Easy clean upholstery fabrics are particularly suitable for households with children or pets. Spills and messes can be quickly cleaned up, ensuring that the furniture remains in good condition even in busy or high-traffic areas.

## 5. Time and Cost Savings:

The stain resistance and ease of cleaning provided by easy clean upholstery fabrics can result in significant time and cost savings. With less time spent on cleaning and maintenance, the upholstery retains its appearance and durability, reducing the need for frequent replacements or professional cleaning services,

### USP

1. We do not accept responsibility for any damage resulting from inappropriate use, chemical cleaning or additional impregnation.
2. Test results were gathered from various samples and therefore represent average indicative values.
3. Discolouration caused by clothing fabrics such as jeans does not represent a material defect. Minor colour deviations and discolouring in context of permissible industrial tolerance standards do not constitute reasons for claims .
